

### **Injectable Medications**

The injectable medications listed below are covered under the Plan's medical benefit. These require pre-authorization and can usually be obtained from Maxor Mail Order. The approval process is simple: the clinical pharmacist will confirm with the prescriber that the dose and directions are appropriate for the diagnosis. If the prescription is for an FDA approved indication, the Maxor clinical pharmacist will issue an authorization. If the prescription is not FDA approved, the Maxor clinical pharmacist will contact the Plan's utilization review department for review by a physician.

Maxor Mail Order can ship approved injectable medications directly to the physician or to the member. Physicians may opt not to accept the mail order supply and may submit the claim to the Plan directly.

This list is not all-inclusive and is subject to change.
