

### Important Information for Healthcare Providers

US Family Health Plan does not credential the following healthcare provider specialties:

- anesthesiologist (except for pain management services)
- critical care
- emergency medicine
- hospitalist
- nurse practitioner (except if primary care provider with independent panel)
- pathologist
- physician assistant (except if primary care provider with independent panel)
- radiologist, diagnostic

Applications received from the above provider types will not be accepted or processed for participation. Instead, the applicant will be notified that the Plan does not credential this provider type and that the application/related documents have been shredded.

The Plan understands that providers in the above categories may be called upon to provide medically necessary healthcare services to USFHP member (i.e., inpatient admission). Please be assured that your claims for medically appropriate services will be reimbursed as network.
